

Angles and Quadrilaterals

Use a straightedge to draw the geometric figures.

- ① Draw 2 examples of a rectangle.

- ② Draw 2 examples of a right triangle.

- ③ How are the shapes in Problems 1 and 2 similar? How are they different?

- ④ a. Draw right angle DEF .

- ⑤ Draw an angle that is larger than a right angle. Label the vertex K .

b. What is the vertex of the angle? Point _____

c. What is another name for $\angle DEF$? _____

Practice

Use U.S. traditional subtraction.

⑥ _____ = $756 - 348$

⑦ $700 - 450 =$ _____

⑧ $7,942 - 3,887 =$ _____
